3. Simple Best-Practice Rules

1. Time-Targeting: Focus ad placements heavily during the evening and late-night slots (post-commute) when this audience is looking to unwind and relax.
2. Format-First: Prioritize high-energy, vertical (9:16) video formats with a 0.5s visual surprise (pattern interrupt) to capture fast-paced attention.

3. Frequency Cap: Limit ad exposure to 3-4 times per user per day to maintain a positive brand association and prevent ad fatigue.
